PKI Group

Our professionally trained staff can handle all kinds of restaurant equipment installations. From walk-in coolers and freezers to bar equipment. We can also pick-up, deliver and safely store your restaurant equipment and products.

We are capable of moving 6,500 pounds over any kind of terrain.

In this particular job all equipment had to be lifted over 45 ft. through a window, since it was a high-rise building. It was a total of 80 pieces for this kitchen, and our staff made it happen!

Welding & Modification

You can count on us for any welding and modifications you may need. Our experienced staff are trained and equipped to do on-site welding and any polishing.

BEFORE

AFTER

Our experienced staff can handle any job. The above shows an on site custom modification for a sandwich press unit.

Perfection

We make sure everything we do is symmetric, lined up and installed accurately and professionally.
